

When the diagnosis is dementia...

Aging Life Care Managers can help with:

Solutions

- Balance issues of safety and independence
- Refer to trusted professionals — legal, medical, social, financial
- Find appropriate living situations and support successful transitions

Daily Living

- Create care plans that may include home care, respite, and day programs
- Tackle difficult issues such as changes in behavior and driving concerns
- Introduce enrichment to each day such as music, dance, art, pets

Medical Management

- Coordinate discharge planning
- Navigate medical appointments and follow-up care
- Advocate with facilities and healthcare providers

Teamwork

- Help to understand changing family roles and complicated feelings
- Provide logistical support – bill paying, errands, clothes shopping, transportation, etc.
- Educate and empower families to meet changing needs
